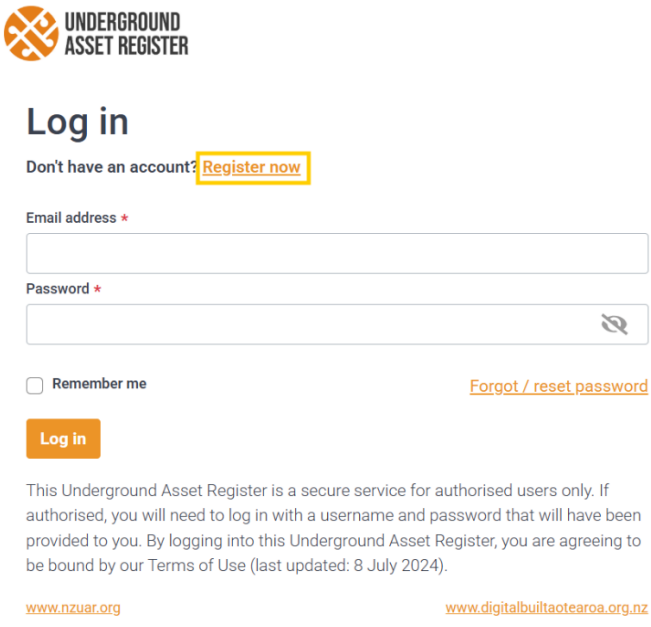
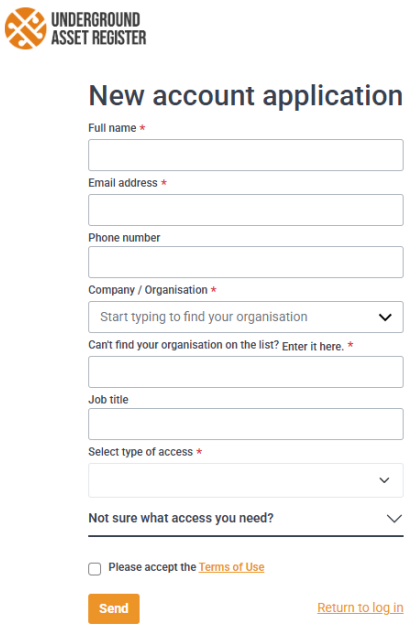
Signing Up & Logging In

Register for an account by clicking the 'Register now' button on the UAR log in page: https://nzuar.org.nz/.





Enter your details into the new account application. When entering your organisation, check whether your organisation already exists in the drop-down list of organisations. Ensure you read and accept the terms and conditions.

We aim to approve account applications within 24 business hours. Once your account has been approved, you'll receive an email to set up your password – this link expires after 48 hours.

Note: We vet all account applications to ensure they work for a legitimate industry organisation. To speed up the approval process, please ensure your email address matches your organisation. We may contact you for more information if we do not recognise your email domain or if it does not match your selected organisation.

There are two user types (i.e. types of access) available to UAR users:

- **General User –** this is the recommended user access for most users – and enables you to view asset data, create Area of Interest queries, and submit site records
- **Asset Manager –** currently this user type enables you to do all of the above, plus you will be able to view what asset data we hold for your organisation, such as contact information for asset types etc

If you have signed up for the wrong user type, don't worry, just drop us an email and we can switch it over.

There is no limit to the number of users per organisation in the UAR.

If you have any questions, don't hesitate to contact us:
