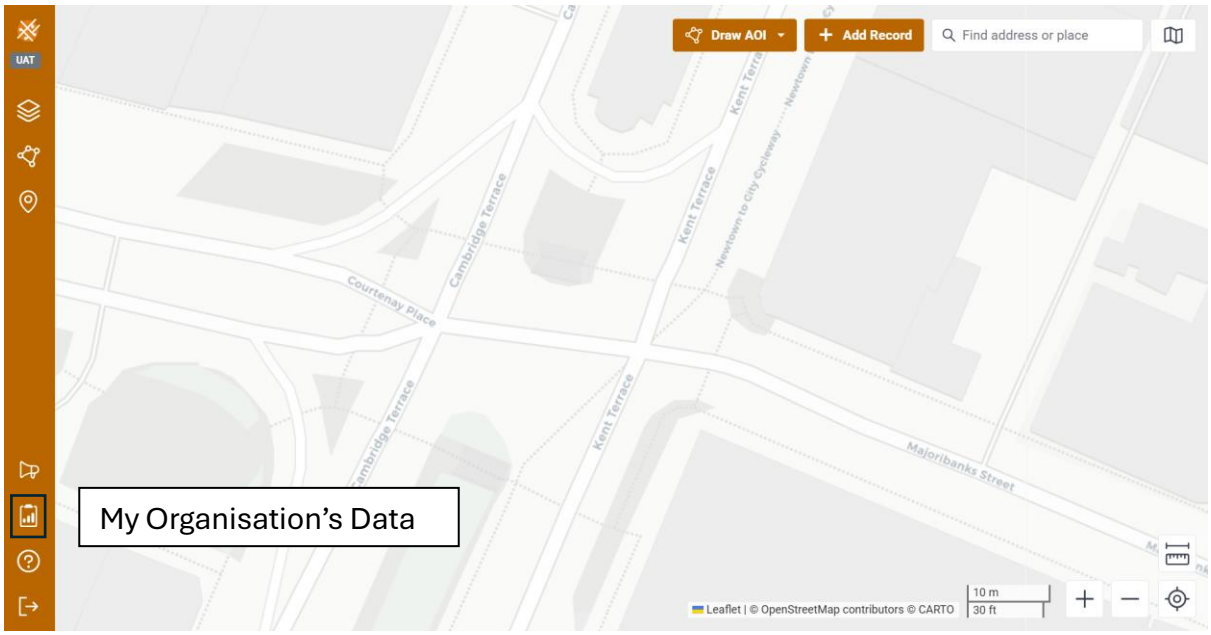
Viewing Your Organisation's Asset Information

If you have signed up for 'Asset Owner' permissions when you signed up for an Underground Asset Register account, you can see what data we hold about your organisation and your datasets. This enables you to check the details are correct, and you can contact us at support@nzuar.org.nz if they are incorrect.

To view the information that we hold about your organisation and your datasets, your account must have the 'Asset Owner' user type. If you did not select this user type when you registered for a UAR account, you can contact us at support@nzuar.org.nz and we can change your user type for you.

My Organisation's Data

If you have the Asset Owner user type, you can open the 'My Organisation's Data' menu via the icon in the sidebar menu, located just above the log-out button. Here, you can view information about each of the asset datasets which your organisation is publishing to the UAR.



If any information about your organisation's datasets is incorrect, please contact us at support@nzuar.org.nz.

If you have any questions, don't hesitate to contact us:
